

## **Chase the Ace**

Chase the Ace can have several variations. Rules, timeframes and percentages may differ depending on the variation, but the general idea is that a jackpot accumulates from week-to-week until it is won, and the game is then over.

Each week participants buy tickets. The funds from ticket sales are divided into three parts; typically the organizers keep a percentage, a percentage goes into a jackpot, and the winner of the draw that week wins a percentage. The weekly winner also draws a card from a deck of playing cards and wins the jackpot if the ace of spades is drawn. If the ace of spades is not drawn, the reduced deck is kept for the following week's game, and the jackpot accumulates.
